EDUCATION

Vellore Institute of Technology

B.Tech — Computer Science and Internet of Things | CGPA: 8.82 / 10

Vellore, Tamil Nadu

Expected 2028

DAV Public School

Class XII — 92%

Kotdwara, Uttarakhand

2023

EXPERIENCE

Hindware Ltd.

Intern

Gurgaon, Haryana

May – June 2025

- Gained hands-on exposure to enterprise software workflows and internal tooling in a corporate environment.
- Collaborated with the development team on web-based projects and modern frameworks.

PROJECTS

Morse Assist — Eye-Twitch Based Assistive Communication System

Patent Pending

ESP32 · IR Sensors · Arduino · Embedded C

- Designed a low-cost, non-invasive assistive communication device for individuals with severe motor impairments, enabling independent communication without physical touch.
- Developed an eye-twitch input mechanism that encodes eye movements as Morse signals and translates them into readable text with 90%+ accuracy.
- Engineered real-time signal processing on ESP32 to reliably distinguish intentional blinks from involuntary eye movements.

StyleCraft — Interactive CSS Learning & Prototyping Platform

stylecraft-web.vercel.app ↗

React 19 · TypeScript · Vite · Zustand · Radix UI · Tailwind CSS v4 · Clerk

[GitHub](#) ↗

- Built a full-stack CSS learning platform featuring 6 interactive labs (Flexbox, Typography, Box Model, Backgrounds, Transforms, Borders) with real-time visual feedback and production-ready code generation.
- Architected per-lab state management using Zustand stores, enabling reactive, isolated control over 40+ CSS properties simultaneously.
- Integrated Clerk authentication to allow users to save and revisit custom design configurations, with accessible UI primitives built on Radix UI.

Easy PDF — AI-Powered PDF Summarization Web App

easy-pdf-wheat.vercel.app ↗

Next.js · React · TypeScript · GPT-4 · LangChain · PostgreSQL · Clerk

[GitHub](#) ↗

- Built a full-stack AI web app that parses and summarizes PDF documents using GPT-4 and LangChain for intelligent text extraction and context-aware responses.
- Implemented secure user authentication with Clerk and a serverless PostgreSQL database for scalable, persistent storage.
- Developed a responsive dashboard with drag-and-drop file upload (up to 16 MB), real-time processing notifications, and reading progress tracking.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C / C++

Frontend: React 19, Next.js, Vite, HTML, CSS, Tailwind CSS v4

Backend & Databases: Node.js, SQL, MySQL, PostgreSQL, REST APIs

State Management: Zustand

AI / ML: LangChain, OpenAI GPT-4 API, Google Gemini API, Prompt Engineering

Embedded & IoT: ESP32, Arduino, IR Sensors, Embedded C

Tools & Platforms: Git, GitHub, Vercel, Clerk
