Contact: +91 8755 378 958

Second Year Computer Science undergraduate focused on web and mobile application development, with hands-on experience in React, Next.js and various technologies. Interested in exploring AI-driven features and intelligent systems, and eager to apply modern web technologies to build scalable, real world applications.

EDUCATION

BACHELOR OF TECHNOLOGY in Computer Science
Vellore Institute of Technology, Vellore
Expected Year of Graduation: 2028

CGPA: 8.7

CLASS XII

DAV Public School, Kotdwara

MARKS: 92%

YEAR: 2023

PROJECTS

Eye-twitch based Assistive Communication System

(Patent Pending)

ESP32, IR Sensors, Adruino

- Designed a low-cost, non-invasive assistive communication system for individuals with severe motor impairments
- Developed an eye-twitch based input mechanism to encode Morse signals and translate them into readable text.
- Developed Morse code encoding mechanism to translate eye movements into readable text with 90%+ accuracy

Easy PDF (AI web app)

Next.js, React, Typescript, GPT-4

- Developed AI-powered PDF summarization tool using GPT-4 and Langchain for document parsing and intelligent text extraction.
- Implemented secure authentication with Clerk and serverless PostgreSQL database.
- Developed responsive dashboard with file upload handling (16MB), real-time processing notifications, and reading progress tracking.

Git-hub Finder

HTML, CSS, JavaScript

- Built a web app that fetches and displays GitHub user data using the GitHub API
 - Added real-time search and basic error handling for invalid users
-

SKILLS

- **Programming languages** : PYTHON, JAVA, C/C++, JAVASCRIPT, TYPESCRIPT
- **Frontend** : HTML,CSS, REACT, TAILWIND CSS
- **Backend & Databases** : Next.js, SQL, mySQL
- **Tools & Platforms** : GIT, GITHUB, VERCEL
